Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-35 and 41-58, drawn to method for treating cancer and a composition therefor comprising an inhibitor of a protein kinase and an agent that inhibits a cellular ATP synthetic pathway, classified in class 514, subclass 252.11, among others.
- II. Claims 36-40, drawn to a method for treating cancer using an inhibitor of a protein kinase, classified in class 514, subclass 252.11, among others.

The inventions are distinct, each from the other because:

Invention of Group I requires an enhanced combination comprising two compounds which yields a synergistic response (Brief Description of the Drawings for Fig. 2).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Additionally, Claims 1, 15 and 36 are generic to a plurality of disclosed patentably distinct species. If Group I is elected Applicant is required under 35 U.S.C. 121 to elect a single disclosed species both an inhibitor of a protein kinase and an agent that inhibits a cellular ATP synthetic pathway. Moreover, if Group II is elected Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of an inhibitor of a protein kinase. Should applicant traverse on the ground that the species are not patentably

distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1614

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

An attempt to reach the attorney was made on December 6, 2005 to request an oral election to the above election requirement, but was unsuccessful.
